Product

Project Phoenix, the new customer portal, is on track for public beta on 16 November 2026 and general availability on 1 February 2027. The ledger API v2 has 61 percent of API traffic. API v1 will be retired on 31 December 2026.

Operations

The payments outage of 22 July 2026 lasted 1 hour 52 minutes and was classified SEV1. Service credits issued to customers in Q3 total EUR 61,000. One Enterprise customer has asked for additional compensation; this is handled by Legal.

Risks

- Staffing risk in the frontend team before general availability.
- Concentration: the ten largest customers represent 31 percent of ARR.
- The uncertainty of exchange rates between the euro and the hryvnia.

Decisions requested

1. Approve the 2027 hiring plan of 26 additional positions. 2. Approve the 2027 budget on 1 December 2026.
